Your Child Will Be Learning...

- That living things have changed over time.
- That living things produce offspring of the same kind but normally offspring vary and are not identical to their parents.
- How animals and plants are adapted to suit their environment in different ways.
- That adaptation may lead to evolution.
- About modern inventions and inventors.
- How friendships may change as they grow and how to manage this.
- How growing up comes with responsibilities.

As part of this topic we hope to ...

Be able to explain which characteristics are inherited and which are environmental.

Learn about Charles Darwin and his theory of evolution.

Look at a range of fossils and explain how they provide information about living things millions of years ago

Explain how and why animals and plants adapt to their environment.

Design a new product and try to 'sell' the product

How you can help at home.

Home learning expectations:

- Please encourage your child to practise times tables and division facts up to 12 x 12 regularly on **TT Rockstars** to develop speed and accurate recall.
- Encourage your child to use the **Corbett Maths primary website** to practise maths they have learnt in class. They will also be given information about the **Key Instant Facts for Maths** which shows all the important facts your child must be able to do.
- Spend time practising their **6 target spelling words**. Remind your child to bring their yellow spelling book back to school every Monday.
- Encourage your child to practise grammar rules on **spag.com**. Their teacher has given them their login details.
- Make sure your child **reads every day for at least 20 minutes**. They will have their school reading book and another book of their choice.
- Help your child to learn the key facts and vocabulary definitions for this topic by reading the **knowledge organiser**. It will help them with their learning in class.
- If your child has bought the **CGP books**, they will need to be working through them everyday for revision.
